

We run 2-3 free clinics a month seeing 40-63 different animals and help an additional 8 animals month with more complex veterinary needs. We distribute hundreds of pounds of dog and cat kibble and cans of food through our events and outreach each month.

We field multiple calls and emails from people with animal related emergencies; they on the edge of eviction, their vehicle has broken down and now they need to move from their vehicle to the streets, they need to be hospitalized or move out of a DV situation. The common thread, how they will manage these transitions and do the best for their beloved animal companion ?
